Guide and Call Book

Dear Friend:

For ten years and more I have had the ambition that some day I would bring out a scientific story magazine, but up to very recently, for many reasons, it was not possible to do so.

You, who have read in SCIENCE AND INVENTION, RADIO NEWS, and THE EXPERIMENTER the scientific fiction stories which we have been running for years, will immediately know what I mean.

There has never been a magazine of the scientific fiction type before, until now. AMAZING STORIES is the answer. If you are interested in the Jules Verne, H. G. Wells type of story, you will be even more interested in AMAZING STORIES, because this magazine will contain only stories of the scientific type.

In the very first issue of AMAZING STORIES there are stories by H. G. Wells, Jules Verne, George Allan England, and many others.

AND HERE IS BIG NEWS: We have secured the entire magazine serial rights for the whole fifteen volumes of Jules Verne's famous and immortal stories. Each and every story that Jules Verne ever wrote will appear in AMAZING STORIES during the next two years. Readers at large in this country have never been able to read the entire works of Jules Verne, because only one de luxe edition, which sold at a high price, was available to a limited number of people heretofore. In the very first issue of AMAZING STORIES we shall print one of Jules Verne's greatest works, "Off on a Comet", an amazing tour through the Universe.

I have made arrangements to publish in AMAZING STORIES the best of English, French, and German scientific fiction, and we have already secured a vast amount of Europe's best "scientifiction". The magazine will be printed in a large size, almost the same size as RADIO NEWS and SCIENCE AND INVENTION, and each story will be illustrated. I shall spare no effort to make this one of the greatest magazines in America.

There is an insistent demand for scientific fiction stories and AMAZING STORIES will be the first to satisfy this popular demand.

As editor of the new publication, I am naturally anxious to have as many of my readers as possible become charter subscribers to AMAZING STORIES.

The first issue will be out on the newsstands on March 1st. The regular price of the magazine is 25c or \$2.50 per year in the United States (foreign \$3.00).

As a special offer to charter subscribers on all subscriptions received on or before March 15th we shall allow a special price of \$2.00 (\$2.50 foreign).

But whether you become a subscriber or not I would appreciate your personal letter telling me what you think of the new venture. I thank you.

With kindest regards,

Yours sincerely,
